Hi Marcia,

Here's my section of the spreadsheet. It starts on row 101 (green highlight) and ends on row 230 (red highlight)

Thanks!

John

How about we divide and conquer. If you can complete 51-100, John does 101-200 and I will do 201-304? The statistician has some bandwidth this week, I would really like to get it to him NLT tomorrow, if possible. Does that work? Pls save your file with the extension of the cells you enter (Jan- File Name\_51\_100; John \_File Name\_101-200).

Regarding the well IDs, I don't see that we need that information unless you are just doing an integrity check. That is fine, but in all of the records I did for R8, and invalid R6, I didn't find duplicate site names that had differing well IDs, unless they had multiple well IDs associated. If they had multiple well IDs associated, then I just added that as a separate line. The survey is conducted on a facility site basis with at least one applicable well ID. I hope this helps you streamline your data pulls.

Marcia,

This is really slow going. I had to clean up data (such as eliminating duplicates) as I went along and do searches for well site names on one spreadsheet because the other spreadsheet didn't have well IDs.

Anyway, I've only done 50 entries and there are at least 250 to go for region 6.

I will keep plugging away but am attaching what I have so far.

Jan
